

COVID-19

Antibody Testing

Starting Aug. 17, 2020, the SARS CoV-2 antibody test, a.k.a. COVID-19 Antibody Test (CAT), will be performed automatically on all blood donations as part of the standard testing that Versiti already performs. The test will inform you if you have antibodies reflective of a prior COVID-19 infection; it will not inform you if you currently have COVID-19.

Please note that everything about the donation process will remain the same, and test results will not affect the release of your blood to hospital partners.

Test results can be accessed in your online account at [Versiti.org](https://www.versiti.org) or the Versiti app in the Wellness Center.

For more information, visit: www.versiti.org/covid19
