

What about COVID-19?

Concerns now exist around the safety of the donation process or hosting a drive. Below are some of the ways Versiti is addressing these concerns and following CDC guidelines, related to coronavirus.

Sterilization

- All beds sanitized between each donor
- New equipment packs for each donor
- Pens and surfaces are cleaned after each use
- Additional hand washing required

Health & Safety

- Staff and donor temperature checks prior to entering donation area
- Masks required for staff and donors
- Health screening ahead of registration

Social Distancing

- Increased space between donation beds, interview booths, health screenings
- Post-donation refresh areas – limit of donors per table or chairs spaced 6' apart
- Increased use of partitions

Essential Activity

- CDC, FDA and local government in-support of the need and safety of donating blood during this time.
